Application for the position as Junior Software Developer | Python

Dear Mr. Lucas,

I am writing to express my interest in the Junior Software Developer | Python position at IBM, which I recently found on Stepstone. With my background in both finance and information technology and my experience as a Payroll Manager at KWS GmbH, I am confident that I possess the skills and abilities necessary to excel in this role.

During my time at KWS GmbH, I worked with various software and computer programs daily. Additionally, I completed a Master's degree in Finance and Payroll from Harvard University, which has provided me with strong critical thinking skills and attention to detail. As someone who is reliable, punctual, and determined, I am confident that I would be a valuable addition to your team.

Furthermore, I am fluent in English as well as being a native Italian speaker and have basic knowledge of Romanian. My keen interest in coding and playing with computers is not only a hobby but also a passion that I believe will enable me to learn new things quickly.

I understand the position requires working with technologies such as AWS Lambda and developing ETL processes. I am excited to have the opportunity to develop Microservices and Serverless Applications using these same tools, and I look forward to the chance to work as a team. My experience and skills align well with the needs of this position, and I am excited about the prospect of making a significant contribution to the team's efforts.

Thank you for your consideration and I hope we can further discuss my application at your convenience.

Sincerely,

Jude Smiley
