## **Application for the position as Junior Software Developer | Python**

Dear Mr. Lucas,

I am writing to apply for the position of Junior Software Developer with a focus on Python, which I have found on Stepstone. As a highly motivated individual with a Master's degree in Finance and Payroll, I am confident that I can make a valuable contribution to IBM's team.

With my experience as a Payroll Manager in KWS GmbH, I have developed proficiency with various software tools, including Excel, which I used daily to optimise payment processes. I am excited to be given the opportunity to apply my attention to detail and critical thinking towards developing Microservices, Serverless Applications (such as AWS Lambda) and ETL processes for your Analysts and Fachbereiche, using my coding skills honed as a hobby.

As a reliable and punctual individual with a strong willingness to learn and be determined, I believe I can bring significant value to IBM's Junior Software Developer team. My proficiency in English, alongside Italian (native) and Romanian is an added advantage for a team working with a multinational clientele.

Thank you for considering my application. I am excited about the opportunity to further discuss how my skills and experience align with the needs of IBM's objectives.

Sincerely,

Jude Smiley
