## **Application for the position as Senior) Python Developer**

Dear Mr. Cameron,

I am writing to express my interest in the (Senior) Python Developer position in your company. As a reliable and detail-oriented Master in Finance graduate, I believe I can be a great addition to your team.

During my previous experience as a Payroll Manager at KWS GmbH, I gained significant experience in using computer and various software applications to manage payments and undertake other routine tasks. I believe that these skills will enable me to excel in your team as a Python Developer. Additionally, my critical thinking ability and willingness to learn new things enable me to adapt to new roles quickly.

What's more, I find digital transformation and coding fascinating, which is why I enjoy playing with computers and coding in my free time. I am excited about the opportunity to work with professionals from your company and contribute my quota towards enhancing your digital transformation initiative.

I understand PwC has an excellent reputation for innovation, trust, and respect in the industry, and I want to be part of it. I look forward to discussing my application in further detail with you and hopefully join your excellent team.

Thank you for considering my application.

Best regards,

Jude Smiley.
